The screenshot shows the top section of a website. At the top left is the 'dialogos' logo. To its right is a navigation menu with the following items: 'Presentation', 'Partners', 'Work Package 2', 'Work Package 3', 'Work Package 4', and 'Contact'. Below the navigation is a large banner image featuring a hand holding a white card. The card has the 'dialogos' logo at the top, followed by the text 'COMMUNICATION IN PUBLIC SERVICE INTERPRETING AND TRANSLATING WITH LANGUAGES OF LESSER DIFFUSION'. Below this text is a 'CONTACT' button. At the bottom of the card, there are two checkmarks followed by the text: '2022-1-ES01-KA220-HED-000086867 s' and 'Coordinator: Universidad de Alcalá (UAH) carmen.pena@uah.e'. The background of the banner is a blurred image of people with colorful speech bubbles overlaid.

This project will help address the communication barriers of migrants, specifically those from countries with languages of lesser diffusion (LLD), for which there is a lack of qualified translating and interpreting professionals by creating a training module and material addressed to heritage and bilingual migrant speakers of LLD who can become Public Services Interpreters and Translators.

The project will focus specifically on the following **objectives**: mapping of LLD in the partners' countries, identifying communication needs, developing materials and resources to help bridge communication gaps with institutions and public services, and developing a training course to migrants (after an analysis of a previous pilot training module) with adequate bilingual and bicultural competences of LLD in order to be able to recruit them as professional and qualified PSIT.

The expected **results** are the following: State of the art review/mapping of current training programmes and activities, as well as available training material on LLD report; Pilot training module analysis report/research and material; Pilot training module; Training materials in languages that are deemed necessary; Open access, blended training module to be implemented in any language in the future; and guidelines and best practices guide.
